

Vista, Box Ceiling Frames

WoodGrain Collection

Vista, Box introduces bold, expansive geometry that elevates any space with a commanding, sculptural presence. The Box design offers a full 24x24 square option that transforms interiors into immersive experiences. This ceiling frame system brings both visual sophistication and acoustic balance to large areas. In galleries, performance venues, and corporate environments, from offices to conference rooms, Vista establishes rhythm and order while fostering acoustic calm, becoming an integral part of the architectural narrative.

What is a Noise Reduction Coefficient (NRC)?

You'll find the NRC rating in the specifications of all of our products. This acronym stands for Noise Reduction Coefficient, and is expressed as a single number, a rating that describes the degree to which acoustic products can absorb sound.

You can use NRC values to understand the overall performance of our acoustic wall and ceiling products. The higher the NRC, the better the product is at soaking up the sound.

Performance Indices: Noise Reduction Coefficient (NRC) results represent the absorption coefficients measured at the one third octave bands at 125, 250, 500, 1000, 2000 and 4000 Hz rounded to the nearest 0.05. Acoustic testing has been performed according to the methods mentioned above. Customization of installation of the product could alter the results. Sound Absorption Average (SAA) indicates the absorption coefficient average for the twelve one-third octave bands ranging between 200 and 2500 Hz.
